Only then can you judge whether you are likely to be able to achieve the income and rewards that you desire.

## **ABOUT BUSINESS PLANNING**

If you are unsure how to do this yourself, seek the assistance of an accountant or another independent professional advisor.

### A twelve-month profit and loss forecast

This predicts how profitable the business is likely to be.

## WEEKLY BREAK EVEN SALES CALCULATION:

- 1) Total cost figure from above
- 2) Overall GP% from above
- 3) Divide (1) by (2) and multiply by 100
- 4) Multiply by 1.2 to add VAT
- 5) Divide by 52 to give weekly break even point

## **CASH FLOW**

The cash flow projection is a support for your ideas for the pub and an aid to help you take an objective look at the financial aspects of the business. It will ensure that you have enough working capital or banking facilities to enable you to operate effectively throughout the first and most difficult year of trading.

Most of the items covered in this projection will match your profit and loss projection. However, it is worth mentioning that the profit and loss does not include VAT and the cash flow does include VAT.

You must try and project each month in turn thinking about how much money you intend to take and what expenses you may have in each particular month. For instance you will probably project taking more money in December than January. You can do this by thinking about your likely drinks sales for each day of the week, adding this together for a weekly total and multiplying for the month. The same can be done for food, by working out how many meals you intend to serve and how much cash you intend to generate from each customer.

NB: Closing bank balance is carried forward each month to balance brought forward. Therefore the calculation in the second month will be total income less expenditure plus balance brought forward equals closing bank balance. This figure may on occasions be a minus figure. This would therefore tell you when it would be necessary to arrange an overdraft facility or that you will need extra working capital.
